

The Lead Registrant Treibacher Industrie AG in collaboration with the Members of the Rare Earth Consortium has prepared the lead registration dossier for the substance Ytterbium (III) oxide (CAS 1314-37-0 | EC 215-234-0). The lead registration dossier has already been submitted to ECHA and covers a full registration for the tonnage band 10-100 tpy.

The initial LoA prices take into account:

- ## 1. Cost sharing model

2. Initial Price of the LoA

The initial prices of the LoA for the substance Ytterbium (III) oxide (CAS 1314-37-0 | EC 215-234-0) per tonnage band are:

Substance	Annex VIII (10-100 tpy)	Annex VII (1-10 tpy)	OSII or TII under SCC (<1000 tpy)
Ytterbium (III) oxide	€ 139 851	€ 15 885	€ 5 000

3. Data used for establishing the initial price of the LoAs

The data used for establishing the initial price of the LoA are summarized in the following table:

Ytterbium (III) oxide (CAS 1314-37-0 EC 215-234-0)			
	Annex VIII (10-100 tpy)	Annex VII (1-10 tpy)	OSII or TII under SCC (<1000 tpy)
LoA price	€ 139 851	€ 15 885	€ 5 000
Provision per LoA/tonnage bands	€ 30 000	€ 5 000	n.a.
The price of the LoA is based on the following main assumptions:			
Total provisions for future costs (°)	€ 105 000	€ 30 000	n.a.
Number of intentions for co-registration (1)	3	3	n.a.

(°): total amounts for provisions per tonnage bands (absolute amount before taking the number of co-registrants into account)

(1): Initial estimation of the number of co-registrants per tonnage bands and including the LR and the Members of the Consortium

The initial LoA-prices indicated in this communication are based on the elements currently available and may be subject to change in view of changes in costs or other changes in circumstances.

As foreseen in the above-mentioned regulation, a yearly documentation will be established containing the theoretical recalculation of the LoA prices taking into account of the actual number of LoA sold per tonnage bands as well as the actual use of the provisions foreseen for future costs). The yearly documentation will be established for a period of 12 years after the last submission of data regarding the above-mentioned lead dossier. At the end of this period, the final reimbursement will take place (if any). If the price of the LoAs is recalculated every year, the sales price remains unchanged and equal to the price during the whole 12-years period (unless otherwise decided by the Consortium). No reimbursement below €1000/ LoA unless the related administrative costs are paid by the requesting party.

It is not possible to estimate exactly the provisions for future costs. The amounts considered for the provisions for future costs are therefore subject to a potential revision over time. The members of the Consortium will evaluate at a later stage whether the initial price of the LoAs are still in line with the current and future expenses foreseen for maintaining the registration dossier. If necessary, an additional amount may be invoiced by the Project manager on behalf of the Lead Registrant.

For on-site or transported intermediates manufactured and used under SCC (Strictly Controlled Conditions) below 1000 tpy, it is possible to refer to the join submission for a lump sum of €5000.00 (Five Thousand Euro). There is no reimbursement mechanism foreseen for the case of on-site or transported intermediates.
